

Carolina Comfort LX Series CH16 Split System Modulating Heat Pumps

UP TO 17.75 SEER AND 10 HSPF/2-5 TONS

Legendary Reliability in a Compact Cabinet

A Carolina Comfort split system modulating heat pump will provide your family with comfort, energy savings and lasting performance even in the toughest conditions. Designed, engineered and assembled in the United States by Johnson Controls, Carolina Comfort LX Series CH16 Split System Heat Pumps feature a protected compressor, adaptive defrost, long-lasting powder-coat paint, durable steel extruded louver coil guards and a suite of advanced technologies in one, compact package.

- **Inverter-driven modulating technology** adjusts capacity from 50–100%, for greater comfort and enhanced efficiency up to 17.75 SEER/10.0 HSPF.
- **Standard ECM or variable-speed blower** choices are available for greater system customization.
- **Adjustable heat pump modes** allow “normal” or “hot” air temperatures to better meet specific comfort needs.
- **Conventional thermostat compatibility** allows use with our advanced Hx™ Touch-screen Thermostat to monitor and control system settings using a smart device from anywhere in the world with internet access.
